WHAT MATTERS
DO YOU

macOS, Linux and ChromeOS

macOS

Demo!

Linux

Demo!

ChromeOS

Demo!

Options?

Community tools and scripts

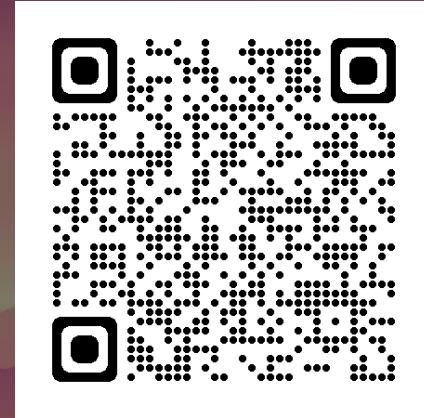

Munki, Octory and Azure

INTUNE

The journey to Munki and Intune

Over time, my focus has revolved around effectively managing application deployments for Macs using a combination of Intune, Munki, Azure DevOps, and Azure Storage. Through dedicated efforts, I've established a highly automated system that handles the majority of tasks seamlessly.

Demo?

Linux and the shell

ChromeOS – no options available

3rd party tools

Jamf Pro

Demo!

Linux – many options, but...

Demo!

ChromeOS – well... Google

Demo!

Strategic avoidance...

VDI – wont fly in many cases

View it as BYOD and force them to web and limited access

Listen to your users and become the hero!

Want, need,
require
